Ricarda Plümpe | jobs@hero-software.de

Welcome — and thank you.

We're genuinely excited that you're taking the time to work through this case study — and we're already looking forward to seeing what you come up with.

At HERO, we build software that helps skilled tradespeople across the DACH region work smarter, not harder. Every day, our platform supports SHK, electrical, PV, roofing, and painting businesses — helping them spend less time on admin and more time on the work that actually matters.

As a Senior GTM Analyst, you'll sit at the intersection of Sales, Marketing, and RevOps — turning raw data into sharp insights and concrete actions. This case study is designed to give you a real taste of the kind of thinking we value: analytical depth, clear communication, and the drive to actually move things forward.

Let's go.

The Situation

You've just joined HERO as Senior GTM Analyst. It's your third week. The CRO pulls you into a meeting with the CEO and says:

"Marketing grew MQLs by +38% over the last two quarters. CPL barely moved. But Bookings only grew +9%. Sales blames lead quality. Marketing says Sales isn't converting. We need to know the truth — and we need a plan."

You have access to:

leads.csv

Lead source, trade, company size, region, lead score, date

activities.csv

Sales activities per lead: call attempts, connects, demos

transcripts_sample.csv

20 anonymized call transcript excerpts (disqualified leads)

bookings.csv

Closed-Won data with lead source attribution

Your Task

01

~60–90 min

Diagnose the Funnel

- Where exactly does the funnel break? Which stage, segment, or lead type?
- What are the 2–3 most likely root causes? Back each hypothesis with data.
- Which hypothesis would you tackle first — and why? (Impact × Feasibility)

02

~30–45 min

The Creative Lever

- The 20 call transcripts are currently not analyzed systematically.
- Show us how you'd use them to generate new insights for Marketing or Sales.
- A conceptual sketch + 1–2 concrete example outputs is enough. Think beyond the obvious.

03

~30–45 min

The Action Plan

- How do you drive implementation? Who do you talk to first — RevOps, Marketing, Sales, CEO?
- How do you measure success? Which metric, timeframe, and threshold?
- What's your plan if your hypothesis doesn't hold after 4 weeks?

What We're Looking For

Analytical Depth

Do you find the real lever — or stay on the surface?

Hypothesis Discipline

Are your conclusions data-backed, not gut-feel?

Driver Mentality

Does your output end with a concrete action plan?

Creative Thinking

How do you use the transcript data? Standard or original?

Stakeholder Communication

Would CEO & CRO understand and buy in within 5 minutes?

We're not looking for perfection — we're looking for **sharp thinking, honest reasoning, and the drive to make things happen.**
Questions before you start? Just reach out — no penalty, we promise. 🙌
